DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 4-5, drawn to a method of manufacturing an in-plane switching liquid crystal display comprising the steps of forming first contact holes in a first inorganic insulating film, forming second contact holes in the first inorganic insulating film, forming third contact holes in the second inorganic insulating film so as to be superposed on the first contact holes, and fourth contact holes in the second inorganic insulating film so as to be super, classified in class 349, subclass 143.
- II. Claims 6-7, drawn to a method of manufacturing an in-plane switching liquid crystal display wherein the interlayer insulating is formed by an inorganic insulating film, and a thickness of the inorganic insulating film is so that when contact holes for connecting the wiring and common electrodes to each other are formed by dry etching, the thickness prevents pinholes created by the dry etching from penetrating through an entirety of the insulating film, classified in class 349, subclass 138.
- III. Claim 8, drawn to a method of manufacturing an in-plane switching liquid crystal display comprising forming contact holes connecting the common wiring and the common electrodes to each other, the contact holes being formed at a ratio of one

Art Unit: 2871

contact hole to a plurality of the pixels with respect to the pixels divided and defined by the scan lines and the signal lines, classified in class 349, subclass 43.

The inventions are distinct, each from the other because of the following reasons:

- 2. Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as not requiring the particular thickness of the inorganic insulating film. See MPEP § 806.05(d).
- 3. Inventions I and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as not requiring the particular ratio of one contact holes to a plurality of the pixels. See MPEP § 806.05(d).
- 4. Inventions II and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention III has separate utility such as not requiring the particular thickness of the inorganic insulating film. See MPEP § 806.05(d).
- 5. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
- 6. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the

Art Unit: 2871

currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Richard H. Kim whose telephone number is (571)272-2294. The examiner can normally be reached on 9:00-6:30 M-F.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Robert H. Kim can be reached on (571)272-2293. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
